

ISO 14001 ENVIRONMENTAL MANAGEMENT SYSTEM

ISO 14001 is an international standard developed by the International Organization for Standardization (ISO) through dedicated technical committees representing approximately 150 countries around the world. Its purpose is to enable an organization of any type or size to develop and implement a policy committing it to prevention of pollution, compliance with legal and other requirements, and continual improvement.

The realization of this commitment will be a management system that recognizes and manages the primary environmental issues through awareness and assessment of applicable legal requirements, objectives for improvement, assignment of responsibilities, competent personnel, communications, procedures, controls and monitoring, emergency response capability, self correction and assessment, and internal reviews.

Benefits of ISO 14001

Implementing ISO 14001 really helps your company in the following way

- Boosts your image
- Compliance to Environmental Legislations
- Improving cost control through materials and Energy
- Reducing Environmental Incidents which results in reputation, liability etc
- Improve Image with Authorities
- Improve Employee ethics
- Improve awareness in the society

ISO 14001 Standard

ISO 14001 and Your Business: How do environmental concerns impact on your business? Not only do we all have to take responsibility for our business processes - both ethically and practically, there are swingeing punishments now in place for polluters of land, air and water, set out in statute.

ISO 14001 has many similarities to ISO 9001:2008, now acknowledged internationally as the premier quality assurance award. And just in the way that many organisations and customers are insisting that their suppliers have ISO 9001:2008, so in turn are they demanding that their suppliers now have ISO 14001.

Acquiring ISO 14001 Certification can give your business a significant edge over rivals.

Competitive Advantage: Demonstrates your environmental commitment to customers who are paying greater attention to the environmental performance of their suppliers.

Financial Improvement: Enhances your ability to identify, implement and maintain operational and administrative efficiencies and cost reductions.

Improved Company Image: Provides a solid foundation for improved relations with your customers, investors, regulators and community.

Continual Improvement: Provides access to the experience of QHSE Certification auditors who can assist with your ongoing improvement efforts.

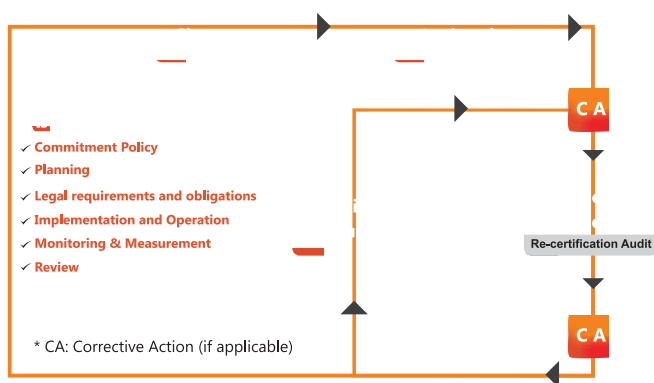

ISO 14001

ENVIRONMENTAL MANAGEMENT SYSTEM

Key steps in our approach are:

- Contract signature
- Pre-audit (optional): gap analysis and diagnosis of your systems current position against requirements of the standard;
- Initial Audit: to verify the establishment and implementation of the basic structure of your EMS
- Certification audit (certificate issued after successful certification audit);
- Surveillance audits to follow the continual improvement;
- Re-certification after 3 years through full audit or continual assessment.

Following each step, a factual and comprehensive report is promptly delivered allowing your company to continually improve its EMS performance.

ISO 14001 Standard

Recognition:

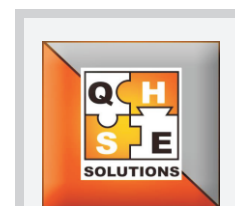

QHSE Certification is accredited by IABCI-(E) for ISO 14001 certification.

Business understanding:

QHSE Certification can be instrumental in the success of your EMS. Our auditors are trained, capable and motivated to bring value and credibility to your environmental management system, while assessing its conformity to ISO 14001. Your auditors will have the necessary sector specific and environmental experience to meet QHSE Certification commitment of Advancing Business Excellence. QHSE Certification recognizes that the standard is meant to work for all types of organizations, and the manner in which it is assessed will be appropriate to your business. With this in mind, we have pioneered innovative new practices. We have extensive capabilities to conduct audits covering multiple standards and specifications, and we routinely offer integrated environmental, quality and health and safety audits. For larger organizations, we can also audit all of your sites and provide analysis of the performance of your management systems

Combined services:

QHSE Certification offers the possibility of combined certifications to the largest range of recognized standards, bringing consistency, optimization and efficiency.
